3. Switch setting

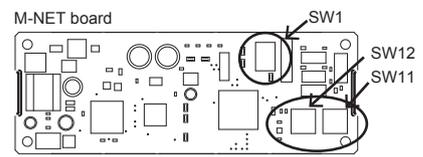

Before installation

Set M-NET address on M-NET board in advance before installing on the electrical box.

(1) M-NET head address setting

The setting should be done by rotary switches SW11 and SW12 on M-NET board. (Factory settings are all Zero)

Make sure to set M-NET address within the range of 01 to 50. When installing two or more outdoor units, do not use the same number more than once for M-NET address.

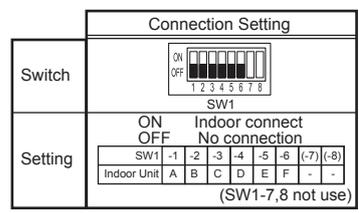

M-NET address No.	1	2	...	50
SW 11 (ones digit)			...	
SW 12 (tens digit)			...	

(2) Indoor unit connection switch setting

Set each indoor unit to ON or OFF with SW1.

◆M-NET address setting

Starting with the M-NET head address set with SW11 and SW12, the M-NET address is automatically allocated in numerical order to each indoor unit which is connected.
